

**UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF NEW YORK**

JUDI FITZGERALD,

Plaintiff,

v.

MONSANTO COMPANY,

Defendant.

COMPLAINT

Civil Action No.

JURY TRIAL DEMANDED

Plaintiff Judi Fitzgerald alleges against Monsanto Company as follows:

INTRODUCTION

1. In 1970, Defendant Monsanto Company, Inc. discovered the herbicidal properties of glyphosate and began marketing it in products in 1974 under the brand name Roundup[®]. Roundup[®] is a non-selective herbicide used to kill weeds that commonly compete with the growing of crops. By 2001, glyphosate had become the most-used active ingredient in American agriculture with 85–90 millions of pounds used annually. That number grew to 185 million pounds by 2007.¹ As of 2013, glyphosate was the world's most widely used herbicide.

2. Monsanto is a multinational agricultural biotechnology corporation based in St. Louis, Missouri. It is the world's leading producer of glyphosate. As of 2009, Monsanto was the world's leading producer of seeds, accounting for 27% of the world seed market.² The majority of these seeds are of the Roundup Ready[®] brand. The stated advantage of Roundup Ready[®]

¹ Grube et al, on behalf of EPA, Pesticides Industry Sales and Usage, 2006-2007 Market Estimates, 14, (2011) available at http://www.epa.gov/pesticides/pestsales/07pestsales/market_estimates2007.pdf .

² ETC Group, Who Will Control the Green Economy?, 22, (2011) available at http://www.etcgroup.org/files/publication/pdf_file/ETC_wwctge_4web_Dec2011.pdf .

crops is that they substantially improve a farmer's ability to control weeds, since glyphosate can be sprayed in the fields during the growing season without harming their crops. In 2010, an estimated 70% of corn and cotton, and 90% of soybean, fields in the United States were Roundup Ready[®].³

3. Monsanto's glyphosate products are registered in 130 countries and approved for use on over 100 different crops.⁴ They are ubiquitous in the environment. Numerous studies confirm that glyphosate is found in rivers, streams, and groundwater in agricultural areas where Roundup[®] is used⁵. It has been found in food⁶, in the urine of agricultural workers^{7 8}, and even in the urine of urban dwellers who are not in direct contact with glyphosate.⁹

4. On March 20, 2015, the International Agency for Research on Cancer ("IARC"), an agency of the World Health Organization ("WHO"), issued an evaluation of several herbicides, including glyphosate. That evaluation was based, in part, on studies of exposures to glyphosate in several countries around the world, and it traces the health implications from exposure to glyphosate since 2001.

⁹ Brändli D, Reinacher S, Herbicides found in Human Urine, 1 Ithaka Journal, 270 (2012), available at <http://www.ithaka-journal.net/druckversionen/e052012-herbicides-urine.pdf>.

5. On July 29, 2015, IARC issued the formal monograph relating to glyphosate. In that monograph, the IARC Working Group provides a thorough review of the numerous studies and data relating to glyphosate exposure in humans.

6. The IARC Working Group classified glyphosate as a Group 2A herbicide, which means that it is probably carcinogenic to humans. The IARC Working Group concluded that the cancers most associated with glyphosate exposure are non-Hodgkin lymphoma and other haematopoietic cancers, including lymphocytic lymphoma/chronic lymphocytic leukemia, B-cell lymphoma, and multiple myeloma.¹⁰

7. The IARC evaluation is significant. It confirms what has been believed for years: that glyphosate is toxic to humans.

8. Nevertheless, Monsanto, since it began selling Roundup[®], has represented it as safe to humans and the environment. Indeed, Monsanto has repeatedly proclaimed and continues to proclaim to the world, and particularly to United States consumers, that glyphosate-based herbicides, including Roundup[®], create no unreasonable risks to human health or to the environment.

JURISDICTION AND VENUE

9. Federal diversity jurisdiction in this Court is proper under 28 U.S.C. § 1332 because Plaintiff Judi Fitzgerald is a citizen of a different state from the Defendant Monsanto Company's states of citizenship, and the aggregate amount in controversy exceeds \$75,000, exclusive of interest and costs.

10. This Court has personal jurisdiction over Monsanto under the New York Long-Arm Statute, N.Y. C.P.L.R. § 302, because Monsanto knows or should have known that its

¹⁰ See Guyton, *et al.* Carcinogenicity of tetrachlorvinphos, parathion, malathion, diazinon and glyphosate, *supra*.

Roundup[®] products are sold throughout the State of New York, and, more specifically, caused Roundup[®] to be sold to Judi Fitzgerald's employer in the State of New York.

11. In addition, Monsanto maintains sufficient contacts with the State of New York such that this Court's exercise of personal jurisdiction over it does not offend traditional notions of fair play and substantial justice.

12. Venue is proper within this District under 28 U.S.C. § 1391 because a substantial part of the events and omissions giving rise to the claims asserted in this Complaint occurred in this District. Further, Monsanto, as a corporate entity, is deemed to reside in any judicial district in which it is subject to personal jurisdiction.

THE PARTIES

PLAINTIFF

13. Plaintiff Judi Fitzgerald resides in Staunton, Virginia. Plaintiff was exposed to Roundup[®] in St. James, New York, from in and around 1994 to and including 1998.

DEFENDANT

14. Defendant Monsanto Company ("Monsanto") is a Delaware corporation with its headquarters and principal place of business in St. Louis, Missouri.

15. At all times relevant to this complaint, Monsanto was the entity that discovered the herbicidal properties of glyphosate and the manufacturer of Roundup[®].

FACTS

16. Glyphosate is a broad-spectrum, non-selective herbicide used in a wide variety of herbicidal products around the world.

17. Plants treated with glyphosate translocate the systemic herbicide to their roots, shoot regions and fruit, where it interferes with the plant's ability to form aromatic amino acids

necessary for protein synthesis. Treated plants generally die within two to three days. Because plants absorb glyphosate, it cannot be completely removed by washing or peeling produce or by milling, baking, or brewing grains.

18. For nearly 40 years, farms across the world have used Roundup[®] without knowing of the dangers its use poses. That is because when Monsanto first introduced Roundup[®], it touted glyphosate as a technological breakthrough: it could kill almost every weed without causing harm either to people or to the environment. Of course, history has shown that not to be true. According to the WHO, the main chemical ingredient of Roundup[®]—glyphosate—is a probable cause of cancer. Those most at risk are farm workers and other individuals with workplace exposure to Roundup[®], such as workers in garden centers, nurseries, and landscapers. Agricultural workers are victims of corporate greed. Monsanto assured the public that Roundup[®] was harmless. In order to prove this, Monsanto championed falsified data and attacked legitimate studies that revealed its dangers. Monsanto led a prolonged campaign of misinformation to convince government agencies, farmers and the general population that Roundup[®] was safe.

The Discovery of Glyphosate and Development of Roundup[®]

19. The herbicidal properties of glyphosate were discovered in 1970 by Monsanto chemist John Franz. The first glyphosate-based herbicide was introduced to the market in the mid-1970s under the brand name Roundup[®].¹¹ From the outset, Monsanto marketed Roundup[®]

¹¹ Backgrounder -History of Monsanto's Glyphosate Herbicide, Monsanto, (Sept. 2, 2015), http://www.monsanto.com/products/documents/glyphosate-background-materials/back_history.pdf.

as a “safe” general-purpose herbicide for widespread commercial and consumer use. It still markets Roundup[®] as safe today.¹²

Registration of Herbicides under Federal Law

20. The manufacture, formulation and distribution of herbicides, such as Roundup[®], are regulated under the Federal Insecticide, Fungicide, and Rodenticide Act (“FIFRA” or “Act”), 7 U.S.C. § 136 *et seq.* FIFRA requires that all pesticides be registered with the Environmental Protection Agency (“EPA” or “Agency”) prior to their distribution, sale, or use, except as described by the Act. 7 U.S.C. § 136a(a)

21. Because pesticides are toxic to plants, animals, and humans, at least to some degree, the EPA requires as part of the registration process, among other things, a variety of tests to evaluate the potential for exposure to pesticides, toxicity to people and other potential non-target organisms, and other adverse effects on the environment. Registration by the EPA, however, is not an assurance or finding of safety. The determination the Agency must make in registering or re-registering a product is not that the product is “safe,” but rather that use of the product in accordance with its label directions “will not generally cause unreasonable adverse effects on the environment.” 7 U.S.C. § 136a(c)(5)(D).

22. FIFRA defines “unreasonable adverse effects on the environment” to mean “any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticide.” 7 U.S.C. § 136(bb). FIFRA thus requires EPA to make a risk/benefit analysis in determining whether a registration should be granted or allowed to continue to be sold in commerce.

¹² [What is Glyphosate?](http://www.monsanto.com/sitecollectiondocuments/glyphosate-safety-health.pdf), Monsanto, (Sept. 2, 2015), <http://www.monsanto.com/sitecollectiondocuments/glyphosate-safety-health.pdf>.

23. The EPA and New York State registered Roundup[®] for distribution, sale, and manufacture in the United States and New York State.

24. FIFRA generally requires that the registrant, Monsanto in the case of Roundup[®], conducts the health and safety testing of pesticide products. The EPA has protocols governing the conduct of tests required for registration and the laboratory practices that must be followed in conducting these tests. The data produced by the registrant must be submitted to the EPA for review and evaluation. The government is not required, nor is it able, however, to perform the product tests that are required of the manufacturer.

25. The evaluation of each pesticide product distributed, sold, or manufactured is completed at the time the product is initially registered. The data necessary for registration of a pesticide has changed over time. The EPA is now in the process of re-evaluating all pesticide products through a Congressionally-mandated process called “re-registration.” 7 U.S.C. § 136a-1. In order to reevaluate these pesticides, the EPA is demanding the completion of additional tests and the submission of data for the EPA’s review and evaluation.

26. In the case of glyphosate, and therefore Roundup[®], the EPA had planned on releasing its preliminary risk assessment—in relation to the reregistration process—no later than July 2015. The EPA completed its review of glyphosate in early 2015, but it delayed releasing the risk assessment pending further review in light of the WHO’s health-related findings.

Scientific Fraud Underlying the Marketing and Sale of Glyphosate/Roundup

27. Based on early studies that glyphosate could cause cancer in laboratory animals, the EPA originally classified glyphosate as *possibly carcinogenic to humans* (Group C) in 1985. After pressure from Monsanto, including contrary studies it provided to the EPA, the EPA changed its classification to *evidence of non-carcinogenicity in humans* (Group E) in 1991. In so

classifying glyphosate, however, the EPA made clear that the designation did not mean the chemical does not cause cancer: “It should be emphasized, however, that designation of an agent in Group E is based on the available evidence at the time of evaluation and should not be interpreted as a definitive conclusion that the agent will not be a carcinogen under any circumstances.”¹³

28. On two occasions, the EPA found that the laboratories hired by Monsanto to test the toxicity of its Roundup[®] products for registration purposes committed fraud.

29. In the first instance, Monsanto, in seeking initial registration of Roundup[®] by EPA, hired Industrial Bio-Test Laboratories (“IBT”) to perform and evaluate pesticide toxicology studies relating to Roundup[®].¹⁴ IBT performed about 30 tests on glyphosate and glyphosate-containing products, including nine of the 15 residue studies needed to register Roundup[®].

30. In 1976, the United States Food and Drug Administration (“FDA”) performed an inspection of IBT that revealed discrepancies between the raw data and the final report relating to the toxicological impacts of glyphosate. The EPA subsequently audited IBT; it too found the toxicology studies conducted for the Roundup[®] herbicide to be invalid.¹⁵ An EPA reviewer stated, after finding “routine falsification of data” at IBT, that it was “hard to believe the

¹³ U.S. Environmental Protection Agency, Memorandum, Subject: SECOND Peer Review of Glyphosate, 1, (1991), available at http://www.epa.gov/pesticides/chem_search/cleared_reviews/csr_PC-103601_30-Oct-91_265.pdf.

¹⁵ U.S. EPA, Summary of the IBT Review Program Office of Pesticide Programs, (1983), available at <http://nepis.epa.gov/Exe/ZyNET.exe/91014ULV.TXT?ZyActionD=ZyDocument&Client=EPA&Index=1981+Thru+1985&Docs=&Query=&Time=&EndTime=&SearchMethod=1&TocRestrict=n&Toc=&TocEntry=&QField=&QFieldYear=&QFieldMonth=&QFieldDay=&IntQFieldOp=0&ExtQFieldOp=0&XmlQuery=&File=D%3A%5Czyfiles%5CIndex%20Data%5C81thru85%5Ctxt%5C00000022%5C91014ULV.txt&User=ANONYMOUS&Password=anonymous&SortMethod=h%7C-&MaximumDocuments=1&FuzzyDegree=0&ImageQuality=r75g8/r75g8/x150y150g16/i425&Display=p%7Cf&DefSeekPage=x&SearchBack=ZyActionL&Back=ZyActionS&BackDesc=Results%20page&MaximumPages=1&ZyEntry=1&SeekPage=x&ZyPURL>.

scientific integrity of the studies when they said they took specimens of the uterus from male rabbits.”¹⁶

31. Three top executives of IBT were convicted of fraud in 1983.

32. In the second incident of data falsification, Monsanto hired Craven Laboratories in 1991 to perform pesticide and herbicide studies, including for Roundup[®]. In that same year, the owner of Craven Laboratories and three of its employees were indicted, and later convicted, of fraudulent laboratory practices in the testing of pesticides and herbicides.¹⁷

33. Despite the falsity of the tests that underlie its registration, within a few years of its launch, Monsanto was marketing Roundup[®] in 115 countries.

The Importance of Roundup[®] to Monsanto's Market Dominance Profits

34. The success of Roundup[®] was key to Monsanto's continued reputation and dominance in the marketplace. Largely due to the success of Roundup[®] sales, Monsanto's agriculture division was out-performing its chemicals division's operating income, and that gap increased yearly. But with its patent for glyphosate expiring in the United States in the year 2000, Monsanto needed a strategy to maintain its Roundup[®] market dominance and to ward off impending competition.

35. In response, Monsanto began the development and sale of genetically engineered Roundup Ready[®] seeds in 1996. Since Roundup Ready[®] crops are resistant to glyphosate; farmers can spray Roundup[®] onto their fields during the growing season without harming the crop. This allowed Monsanto to expand its market for Roundup[®] even further; by 2000,

¹⁶ Robin, Marie-Monique. The World According to Monsanto: Pollution, Corruption and the Control of the World's Food Supply (2011). Citing U.S. EPA. Data validation. Memo from K. Locke, Toxicology Branch, to R. Taylor, Registration Branch. Washington, D.C. (August 9, 1978).

¹⁷ Backgrounder. Testing Fraud: IBT and Craven Laboratories, Monsanto, supra.

Monsanto's biotechnology seeds were planted on more than 80 million acres worldwide and nearly 70% of American soybeans were planted from Roundup Ready® seeds. It also secured Monsanto's dominant share of the glyphosate/Roundup® market through a marketing strategy that coupled proprietary Roundup Ready® seeds with continued sales of its Roundup® herbicide.

36. Through a three-pronged strategy of increased production, decreased prices, and by coupling with Roundup Ready® seeds, Roundup® became Monsanto's most profitable product. In 2000, Roundup® accounted for almost \$2.8 billion in sales, outselling other herbicides by a margin of five to one, and accounting for close to half of Monsanto's revenue.¹⁸ Today, glyphosate remains one of the world's largest herbicides by sales volume.

Monsanto has known for decades that it falsely advertises the safety of Roundup®

37. In 1996, the New York Attorney General ("NYAG") filed a lawsuit against Monsanto based on its false and misleading advertising of Roundup® products. Specifically, the lawsuit challenged Monsanto's general representations that its spray-on glyphosate-based herbicides, including Roundup®, were "**safer than table salt**" and "**practically non-toxic**" to mammals, birds, and fish. Among the representations the NYAG found deceptive and misleading about the human and environmental safety of Roundup® are the following:

- a) Remember that environmentally friendly Roundup herbicide is biodegradable. It won't build up in the soil so you can use Roundup with confidence along customers' driveways, sidewalks and fences ...
- b) And remember that Roundup is biodegradable and won't build up in the soil. That will give you the environmental confidence you need to use Roundup everywhere you've got a weed, brush, edging or trimming problem.

¹⁸ David Barboza, The Power of Roundup: A Weed Killer Is A Block for Monsanto to Build On, N.Y. Times, Aug. 2, 2001, available at <http://www.nytimes.com/2001/08/02/business/the-power-of-roundup-a-weed-killer-is-a-block-for-monsanto-to-build-on.html>.

- c) Roundup biodegrades into naturally occurring elements.
- d) Remember that versatile Roundup herbicide stays where you put it. That means there's no washing or leaching to harm customers' shrubs or other desirable vegetation.
- e) This non-residual herbicide will not wash or leach in the soil. It ... stays where you apply it.
- f) You can apply Accord with “ confidence because it will stay where you put it” it bonds tightly to soil particles, preventing leaching. Then, soon after application, soil microorganisms biodegrade Accord into natural products.
- g) Glyphosate is less toxic to rats than table salt following acute oral ingestion.
- h) Glyphosate's safety margin is much greater than required. It has over a 1,000-fold safety margin in food and over a 700-fold safety margin for workers who manufacture it or use it.
- i) You can feel good about using herbicides by Monsanto. They carry a toxicity category rating of 'practically non-toxic' as it pertains to mammals, birds and fish.
- j) “Roundup can be used where kids and pets will play and breaks down into natural material.” This ad depicts a person with his head in the ground and a pet dog standing in an area which has been treated with Roundup.¹⁹

38. On November 19, 1996, Monsanto entered into an Assurance of Discontinuance with NYAG, in which Monsanto agreed, among other things, “to cease and desist from publishing or broadcasting any advertisements [in New York] that represent, directly or by implication” that:

- a) its glyphosate-containing pesticide products or any component thereof are safe, non-toxic, harmless or free from risk.

¹⁹ *In the Matter of Monsanto Company*, Office of the Attorney General of the State of New York, Assurance of Discontinuance Pursuant to Executive Law § 63(15) (Nov. 1996).

* * *

b) its glyphosate-containing pesticide products or any component thereof manufactured, formulated, distributed or sold by Monsanto are biodegradable

* * *

c) its glyphosate-containing pesticide products or any component thereof stay where they are applied under all circumstances and will not move through the environment by any means.

* * *

d) its glyphosate-containing pesticide products or any component thereof are "good" for the environment or are "known for their environmental characteristics."

* * *

e) glyphosate-containing pesticide products or any component thereof are safer or less toxic than common consumer products other than herbicides;

f) its glyphosate-containing products or any component thereof might be classified as "practically non-toxic."

39. Monsanto did not alter its advertising in the same manner in any state other than New York, and on information and belief still has not done so today.

40. In 2009, France's highest court ruled that Monsanto had not told the truth about the safety of Roundup®. The French court affirmed an earlier judgement that Monsanto had falsely advertised its herbicide Roundup® as "biodegradable" and that it "left the soil clean."²⁰

²⁰ Monsanto Guilty in 'false ad' row. BBC, Oct. 15, 2009, available at <http://news.bbc.co.uk/2/hi/europe/8308903.stm>.

Classifications and Assessments of Glyphosate

41. The IARC process for the classification of glyphosate followed the stringent procedures for the evaluation of a chemical agent. Over time, the IARC Monograph program has reviewed 980 agents. Of those reviewed, it has determined 116 agents to be Group 1 (Known Human Carcinogens); 73 agents to be Group 2A (Probable Human Carcinogens); 287 agents to be Group 2B (Possible Human Carcinogens); 503 agents to be Group 3 (Not Classified); and one agent to be Probably Not Carcinogenic.

42. The established procedure for IARC Monograph evaluations is described in the IARC Programme's Preamble.²¹ Evaluations are performed by panels of international experts, selected on the basis of their expertise and the absence of actual or apparent conflicts of interest.

43. One year before the Monograph meeting, the meeting is announced and there is a call both for data and for experts. Eight months before the Monograph meeting, the Working Group membership is selected and the sections of the Monograph are developed by the Working Group members. One month prior to the Monograph meeting, the call for data is closed and the various draft sections are distributed among Working Group members for review and comment. Finally, at the Monograph meeting, the Working Group finalizes review of all literature, evaluates the evidence in each category, and completes the overall evaluation. Within two weeks after the Monograph meeting, the summary of the Working Group findings are published in *Lancet Oncology*, and within a year after the meeting, the final Monograph is finalized and published.

44. In assessing an agent, the IARC Working Group reviews the following information: (a) human, experimental, and mechanistic data; (b) all pertinent epidemiological

²¹ World Health Organization, [IARC Monographs on the Evaluation of Carcinogenic Risks to Humans: Preamble](http://monographs.iarc.fr/ENG/Preamble/CurrentPreamble.pdf), (2006), available at <http://monographs.iarc.fr/ENG/Preamble/CurrentPreamble.pdf>.

studies and cancer bioassays; and (c) representative mechanistic data. The studies must be publicly available and have sufficient detail for meaningful review, and reviewers cannot be associated with the underlying study.

45. In March 2015, IARC reassessed glyphosate. The summary published in *The Lancet Oncology* reported that glyphosate is a Group 2A agent and probably carcinogenic in humans.

46. On July 29, 2015, IARC issued its Monograph for glyphosate, Monograph 112. For Volume 112, the volume that assessed glyphosate, a Working Group of 17 experts from 11 countries met at IARC from March 3–10, 2015 to assess the carcinogenicity of certain herbicides, including glyphosate. The March meeting culminated nearly a one-year review and preparation by the IARC Secretariat and the Working Group, including a comprehensive review of the latest available scientific evidence. According to published procedures, the Working Group considered “reports that have been published or accepted for publication in the openly available scientific literature” as well as “data from governmental reports that are publicly available”.

47. The studies considered the following exposure groups: occupational exposure of farmers and tree nursery workers in the United States, forestry workers in Canada and Finland and municipal weed-control workers in the United Kingdom; and para-occupational exposure in farming families.

48. Glyphosate was identified as the second-most used household herbicide in the United States for weed control between 2001 and 2007 and the most heavily used herbicide in the world in 2012.

49. Exposure pathways are identified as air (especially during spraying), water, and food. Community exposure to glyphosate is widespread and found in soil, air, surface water, and groundwater, as well as in food.

50. The assessment of the IARC Working Group identified several case control studies of occupational exposure in the United States, Canada, and Sweden. These studies show a human health concern from agricultural and other work-related exposure to glyphosate.

51. The IARC Working Group found an increased risk between exposure to glyphosate and non-Hodgkin lymphoma (“NHL”) and several subtypes of NHL, and the increased risk persisted after adjustment for other pesticides.

52. The IARC Working Group also found that glyphosate caused DNA and chromosomal damage in human cells. One study in community residents reported increases in blood markers of chromosomal damage (micronuclei) after glyphosate formulations were sprayed.

53. In male CD-1 mice, glyphosate induced a positive trend in the incidence of a rare tumor, renal tubule carcinoma. A second study reported a positive trend for haemangiosarcoma in male mice. Glyphosate increased pancreatic islet-cell adenoma in male rats in two studies. A glyphosate formulation promoted skin tumors in an initiation-promotion study in mice.

54. The IARC Working Group also noted that glyphosate has been detected in the urine of agricultural workers, indicating absorption. Soil microbes degrade glyphosate to aminomethylphosphoric acid (AMPA). Blood AMPA detection after exposure suggests intestinal microbial metabolism in humans.

55. The IARC Working Group further found that glyphosate and glyphosate formulations induced DNA and chromosomal damage in mammals, and in human and animal cells in utero.

56. The IARC Working Group also noted genotoxic, hormonal, and enzymatic effects in mammals exposed to glyphosate.²² Essentially, glyphosate inhibits the biosynthesis of aromatic amino acids, which leads to several metabolic disturbances, including the inhibition of protein and secondary product biosynthesis and general metabolic disruption.

57. The IARC Working Group also reviewed an Agricultural Health Study, consisting of a prospective cohort of 57,311 licensed pesticide applicators in Iowa and North Carolina. While this study differed from others in that it was based on a self-administered questionnaire, the results support an association between glyphosate exposure and Multiple Myeloma, Hairy Cell Leukemia (HCL), and Chronic Lymphocytic Leukemia (CLL), in addition to several other cancers.

Other Earlier Findings About Glyphosate's Dangers to Human Health

58. The EPA has a technical fact sheet, as part of its Drinking Water and Health, National Primary Drinking Water Regulations publication, relating to glyphosate. This technical fact sheet predates the IARC March 20, 2015, evaluation. The fact sheet describes the release patterns for glyphosate as follows:

Release Patterns

Glyphosate is released to the environment in its use as a herbicide for controlling woody and herbaceous weeds on forestry, right-of-way, cropped and non-cropped sites. These sites may be around water and in wetlands.

²² Guyton, *et al.* Carcinogenicity of tetrachlorvinphos, parathion, malathion, diazinon and glyphosate, *supra* at 77.

It may also be released to the environment during its manufacture, formulation, transport, storage, disposal and cleanup, and from spills. Since glyphosate is not a listed chemical in the Toxics Release Inventory, data on releases during its manufacture and handling are not available.

Occupational workers and home gardeners may be exposed to glyphosate by inhalation and dermal contact during spraying, mixing, and cleanup. They may also be exposed by touching soil and plants to which glyphosate was applied. Occupational exposure may also occur during glyphosate's manufacture, transport storage, and disposal.²³

59. In 1995, the Northwest Coalition for Alternatives to Pesticides reported that in California, the state with the most comprehensive program for reporting of pesticide-caused illness, glyphosate was the third most commonly-reported cause of pesticide illness among agricultural workers.²⁴

Recent Worldwide Bans on Roundup®/Glyphosate

60. Several countries around the world have instituted bans on the sale of Roundup® and other glyphosate-containing herbicides, both before and since IARC first announced its assessment for glyphosate in March 2015, and more countries undoubtedly will follow suit as the dangers of the use of Roundup® become more widely known. The Netherlands issued a ban on all glyphosate-based herbicides in April 2014, including Roundup®, which takes effect by the end of 2015. In issuing the ban, the Dutch Parliament member who introduced the successful legislation stated: “Agricultural pesticides in user-friendly packaging are sold in abundance to private persons. In garden centers, Roundup® is promoted as harmless, but unsuspecting

²³ U.S. EPA, Technical Factsheet on: Glyphosate, *supra*.

Policy Seminar (1993).

customers have no idea what the risks of this product are. Children, in particular, are sensitive to toxic substances and should therefore not be exposed to it.”²⁵

61. The Brazilian Public Prosecutor in the Federal District requested that the Brazilian Justice Department suspend the use of glyphosate.²⁶

62. France banned the private sale of Roundup[®] and glyphosate following the IARC assessment for Glyphosate.²⁷

63. Bermuda banned both the private and commercial sale of glyphosates, including Roundup[®]. The Bermuda government explained its ban as follows: “Following a recent scientific study carried out by a leading cancer agency, the importation of weed spray ‘Roundup’ has been suspended.”²⁸

64. The Sri Lankan government banned the private and commercial use of glyphosates, particularly out of concern that Glyphosate has been linked to fatal kidney disease in agricultural workers.²⁹

65. The government of Columbia announced its ban on using Roundup[®] and glyphosate to destroy illegal plantations of coca, the raw ingredient for cocaine, because of the WHO's finding that glyphosate is probably carcinogenic.³⁰

Plaintiff's Exposure to Roundup[®]

66. Plaintiff Judi Fitzgerald was born in August 1951. From 1994 to 1998, Ms. Fitzgerald was employed at N & O Horticultural Products in St. James, New York. She held the position of Growers Assistant. Ms. Fitzgerald worked principally growing plants and vegetables, both in the nursery and in the fields. During her time working at N & O Horticultural Products, Ms. Fitzgerald recalls that Roundup[®] was used regularly in the greenhouse and outside. She was present when Roundup[®] was sprayed both indoors and outdoors. She recalls the vapors of Roundup[®] inside the building and the wind drifts of Roundup[®] outside when applied. While Ms. Fitzgerald did not personally apply Roundup[®], she was frequently within several feet of the area where Roundup[®] was being sprayed. On at least several occasions, Ms. Fitzgerald became ill within hours of being in the vicinity of the spraying of Roundup[®].

67. During the entire time she worked at N & O Horticultural Products, Ms. Fitzgerald did not know that exposure to Roundup[®] was injurious to her health or to the health of others.

68. Ms. Fitzgerald was diagnosed with Chronic Lymphocytic Leukemia (CLL) on October 15, 2012. She first learned that exposure to Roundup[®] can cause CLL and other serious illnesses sometime after March 2015 when IARC first published its evaluation of glyphosate.

³⁰ Columbia to ban coca spraying herbicide glyphosate, BBC, May 10, 2015, available at <http://www.bbc.com/news/world-latin-america-32677411>.

69. Since becoming ill, Ms. Fitzgerald has been unable to work and had to move from Long Island to Virginia for economic reasons.

CLAIM ONE

STRICT LIABILITY (DESIGN DEFECT)

70. Plaintiff incorporates by reference each and every allegation set forth in the preceding paragraphs as if fully stated herein.

71. Plaintiff brings this strict liability claim against Defendant for defective design.

72. At all times relevant to this litigation, Defendant engaged in the business of testing, developing, designing, manufacturing, marketing, selling, distributing, and promoting Roundup[®] products, which are defective and unreasonably dangerous to consumers, including Plaintiff, thereby placing Roundup[®] products into the stream of commerce. These actions were under the ultimate control and supervision of Defendant. At all times relevant to this litigation, Defendant designed, researched, developed, manufactured, produced, tested, assembled, labeled, advertised, promoted, marketed, sold, and distributed the Roundup[®] products used by the Plaintiff, as described above.

73. At all times relevant to this litigation, Defendant's Roundup[®] products were manufactured, designed, and labeled in an unsafe, defective, and inherently dangerous manner that was dangerous for use by or exposure to the public, and, in particular, the Plaintiff.

74. At all times relevant to this litigation, Defendant's Roundup[®] products reached the intended consumers, handlers, and users or other persons coming into contact with these products in New York and throughout the United States, including Plaintiff, without substantial change in their condition as designed, manufactured, sold, distributed, labeled, and marketed by Defendant.

75. Defendant's Roundup[®] products, as researched, tested, developed, designed, licensed, manufactured, packaged, labeled, distributed, sold, and marketed by Defendant were defective in design and formulation in that when they left the hands of the Defendant's manufacturers and/or suppliers, they were unreasonably dangerous and dangerous to an extent beyond that which an ordinary consumer would contemplate.

76. Defendant's Roundup[®] products, as researched, tested, developed, designed, licensed, manufactured, packaged, labeled, distributed, sold, and marketed by Defendant were defective in design and formulation in that when they left the hands of Defendant's manufacturers and/or suppliers, the foreseeable risks exceeded the alleged benefits associated with their design and formulation.

77. At all times relevant to this action, Defendant knew or had reason to know that its Roundup[®] products were defective and were inherently dangerous and unsafe when used in the manner instructed and provided by Defendant.

78. Therefore, at all times relevant to this litigation, Defendant's Roundup[®] products, as researched, tested, developed, designed, licensed, manufactured, packaged, labeled, distributed, sold and marketed by Defendant were defective in design and formulation, in one or more of the following ways:

- a. When placed in the stream of commerce, Defendant's Roundup[®] products were defective in design and formulation, and, consequently, dangerous to an extent beyond that which an ordinary consumer would contemplate.
- b. When placed in the stream of commerce, Defendant's Roundup[®] products were unreasonably dangerous in that they were hazardous and posed a

grave risk of cancer and other serious illnesses when used in a reasonably anticipated manner.

- c. When placed in the stream of commerce, Defendant's Roundup[®] products contained unreasonably dangerous design defects and were not reasonably safe when used in a reasonably anticipated or intended manner.
- d. Defendant did not sufficiently test, investigate, or study its Roundup[®] products and, specifically, the active ingredient glyphosate.
- e. Exposure to Roundup[®] and glyphosate-containing products presents a risk of harmful side effects that outweigh any potential utility stemming from the use of the herbicide.
- f. Defendant knew or should have known at the time of marketing its Roundup[®] products that exposure to Roundup[®] and specifically, its active ingredient glyphosate, could result in cancer and other severe illnesses and injuries.
- g. Defendant did not conduct adequate post-marketing surveillance of its Roundup[®] products.
- h. Defendant could have employed safer alternative designs and formulations.

79. Plaintiff was exposed to Defendant's Roundup[®] products in the course of her employment as a horticultural worker, as described above, without knowledge of their dangerous characteristics.

80. At all times relevant to this litigation, Plaintiff used and/or was exposed to the use of Defendant's Roundup[®] products in an intended or reasonably foreseeable manner without knowledge of their dangerous characteristics.

81. Plaintiff could not have reasonably discovered the defects and risks associated with Roundup[®] or glyphosate-containing products before or at the time of exposure.

82. The harm caused by Defendant's Roundup[®] products far outweighed their benefit, rendering Defendant's products dangerous to an extent beyond that which an ordinary consumer would contemplate. Defendant's Roundup[®] products were and are more dangerous than alternative products and Defendant could have designed its Roundup[®] products to make them less dangerous. Indeed, at the time that Defendant designed its Roundup[®] products, the state of the industry's scientific knowledge was such that a less risky design or formulation was attainable.

83. At the time Roundup[®] products left Defendant's control, there was a practical, technically feasible and safer alternative design that would have prevented the harm without substantially impairing the reasonably anticipated or intended function of Defendant's herbicides.

84. Defendant's defective design of its Roundup[®] products was willful, wanton, fraudulent, malicious, and conducted with reckless disregard for the health and safety of users of the Roundup[®] products, including the Plaintiff herein.

85. Therefore, as a result of the unreasonably dangerous condition of its Roundup[®] products, Defendant is strictly liable to Plaintiff.

86. The defects in Defendant's Roundup[®] products were substantial and contributing factors in causing Plaintiff's grave injuries, and, but for Defendant's misconduct and omissions, Plaintiff would not have sustained her injuries.

87. Defendant's conduct, as described above, was reckless. Defendant risked the lives of consumers and users of its products, including Plaintiff, with knowledge of the safety problems associated with Roundup[®] and glyphosate-containing products, and suppressed this knowledge from the general public. Defendant made conscious decisions not to redesign, warn, or inform the unsuspecting public. Defendant's reckless conduct warrants an award of punitive damages.

88. As a direct and proximate result of Defendant placing its defective Roundup[®] products into the stream of commerce, Plaintiff has suffered and continues to suffer grave injuries, and has endured physical pain and discomfort, as well as economic hardship, including considerable financial expenses for medical care and treatment. Plaintiff will continue to incur these expenses in the future.

89. WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands a jury trial on the issues contained herein.

CLAIM TWO

STRICT LIABILITY (FAILURE TO WARN)

90. Plaintiff incorporates by reference each and every allegation set forth in the preceding paragraphs as if fully stated herein.

91. Plaintiff brings this strict liability claim against Defendant for failure to warn.

92. At all times relevant to this litigation, Defendant engaged in the business of testing, developing, designing, manufacturing, marketing, selling, distributing, and promoting Roundup[®] products, which are defective and unreasonably dangerous to consumers, including Plaintiff, because they do not contain adequate warnings or instructions concerning the dangerous characteristics of Roundup[®] and specifically, the active ingredient glyphosate. These actions were under the ultimate control and supervision of Defendant.

93. Defendant researched, developed, designed, tested, manufactured, inspected, labeled, distributed, marketed, promoted, sold, and otherwise released into the stream of commerce its Roundup[®] products, and in the course of same, directly advertised or marketed the products to consumers and end users, including the Plaintiff, Plaintiff's employer, Plaintiff's co-workers, and persons responsible for consumers (such as employers), and therefore had a duty to warn of the risks associated with the use of Roundup[®] and glyphosate-containing products.

94. At all times relevant to this litigation, Defendant had a duty to properly test, develop, design, manufacture, inspect, package, label, market, promote, sell, distribute, maintain supply, provide proper warnings, and take such steps as necessary to ensure that its Roundup[®] products did not cause users and consumers to suffer from unreasonable and dangerous risks. Defendant had a continuing duty to warn the Plaintiff of the dangers associated with Roundup[®] use and exposure. Defendant, as manufacturer, seller, or distributor of chemical herbicides is held to the knowledge of an expert in the field.

95. At the time of manufacture, Defendant could have provided the warnings or instructions regarding the full and complete risks of Roundup[®] and glyphosate-containing products because it knew or should have known of the unreasonable risks of harm associated with the use of and/or exposure to such products.

96. At all times relevant to this litigation, Defendant failed to investigate, study, test, or promote the safety or to minimize the dangers to users and consumers of its products and to those who would foreseeably use or be harmed by Defendant's herbicides, including Plaintiff.

97. Despite the fact that Defendant knew or should have known that Roundup[®] posed a grave risk of harm, it failed to exercise reasonable care to warn of the dangerous risks associated with use and exposure. The dangerous propensities of its products and the carcinogenic characteristics of glyphosate, as described above, were known to Defendant, or scientifically knowable to Defendant through appropriate research and testing by known methods, at the time it distributed, supplied, or sold the product, and not known to end users and consumers, such as Plaintiff and the horticultural company who employed her.

98. Defendant knew or should have known that its products created significant risks of serious bodily harm to consumers, as alleged herein, and Defendant failed to adequately warn consumers and reasonably foreseeable users of the risks of exposure to its products. Defendant has wrongfully concealed information concerning the dangerous nature of Roundup[®] and its active ingredient glyphosate, and further made false and/or misleading statements concerning the safety of Roundup[®] and glyphosate.

99. At all times relevant to this litigation, Defendant's Roundup[®] products reached the intended consumers, handlers, and users or other persons coming into contact with these products in New York and throughout the United States, including Plaintiff, without substantial change in their condition as designed, manufactured, sold, distributed, labeled, and marketed by Defendant.

100. Plaintiff was exposed to Defendant's Roundup[®] products in the course of her employment as a horticultural worker, as described above, without knowledge of their dangerous characteristics.

101. At all times relevant to this litigation, Plaintiff used and/or was exposed to the use of Defendant's Roundup[®] products in their intended or reasonably foreseeable manner without knowledge of their dangerous characteristics.

102. Plaintiff could not have reasonably discovered the defects and risks associated with Roundup[®] or glyphosate-containing products prior to or at the time of Plaintiff's exposure. Plaintiff relied upon the skill, superior knowledge, and judgment of Defendant.

103. Defendant knew or should have known that the minimal warnings disseminated with its Roundup[®] products were inadequate, but they failed to communicate adequate information on the dangers and safe use/exposure and failed to communicate warnings and instructions that were appropriate and adequate to render the products safe for their ordinary, intended and reasonably foreseeable uses, including agricultural and horticultural applications.

104. The information that Defendant did provide or communicate failed to contain relevant warnings, hazards, and precautions that would have enabled horticultural workers such as Plaintiff to utilize the products safely and with adequate protection. Instead, Defendant disseminated information that was inaccurate, false, and misleading and which failed to communicate accurately or adequately the comparative severity, duration, and extent of the risk of injuries with use of and/or exposure to Roundup[®] and glyphosate; continued to aggressively promote the efficacy of its products, even after it knew or should have known of the unreasonable risks from use or exposure; and concealed, downplayed, or otherwise suppressed,

through aggressive marketing and promotion, any information or research about the risks and dangers of exposure to Roundup[®] and glyphosate.

105. To this day, Defendant has failed to adequately and accurately warn of the true risks of Plaintiff's injuries associated with the use of and exposure to Roundup[®] and its active ingredient glyphosate, a probable carcinogen.

106. As a result of their inadequate warnings, Defendant's Roundup[®] products were defective and unreasonably dangerous when they left the possession and/or control of Defendant, were distributed by Defendant, and used by Plaintiff in the course of her employment as a horticultural worker.

107. Defendant is liable to Plaintiff for injuries caused by its negligent or willful failure, as described above, to provide adequate warnings or other clinically relevant information and data regarding the appropriate use of its products and the risks associated with the use of or exposure to Roundup[®] and glyphosate.

108. The defects in Defendant's Roundup[®] products were substantial and contributing factors in causing Plaintiff's injuries, and, but for Defendant's misconduct and omissions, Plaintiff would not have sustained their injuries.

109. Had Defendant provided adequate warnings and instructions and properly disclosed and disseminated the risks associated with its Roundup[®] products, Plaintiff could have avoided the risk of developing injuries as alleged herein and the company who employed Plaintiff could have obtained alternative herbicides.

110. As a direct and proximate result of Defendant placing its defective Roundup[®] products into the stream of commerce, Plaintiff has suffered and continues to suffer severe injuries, and has endured physical pain and discomfort, as well as economic hardship, including

considerable financial expenses for medical care and treatment. Plaintiff will continue to incur these expenses in the future.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands a jury trial on the issues contained herein.

CLAIM THREE

NEGLIGENCE

111. Plaintiff incorporates by reference each and every allegation set forth in the preceding paragraphs as if fully stated herein.

112. Defendant, directly or indirectly, caused Roundup[®] products to be sold, distributed, packaged, labeled, marketed, promoted, and/or used by Plaintiff.

113. At all times relevant to this litigation, Defendant had a duty to exercise reasonable care in the design, research, manufacture, marketing, advertisement, supply, promotion, packaging, sale, and distribution of its Roundup[®] products, including the duty to take all reasonable steps necessary to manufacture, promote, and/or sell a product that was not unreasonably dangerous to consumers and users of the product.

114. At all times relevant to this litigation, Defendant had a duty to exercise reasonable care in the marketing, advertisement, and sale of the Roundup[®] products. Defendant's duty of care owed to consumers and the general public included providing accurate, true, and correct information concerning the risks of using Roundup[®] and appropriate, complete, and accurate warnings concerning the potential adverse effects of exposure to Roundup[®], and, in particular, its active ingredient glyphosate.

115. At all times relevant to this litigation, Defendant knew or, in the exercise of reasonable care, should have known of the hazards and dangers of Roundup[®] and specifically, the carcinogenic properties of the chemical glyphosate.

116. Accordingly, at all times relevant to this litigation, Defendant knew or, in the exercise of reasonable care, should have known that use of or exposure to its Roundup[®] products could cause or be associated with Plaintiff's injuries and thus created a dangerous and unreasonable risk of injury to the users of these products, including Plaintiff.

117. Defendant also knew or, in the exercise of reasonable care, should have known that users and consumers of Roundup[®] were unaware of the risks and the magnitude of the risks associated with use of and/or exposure to Roundup[®] and glyphosate-containing products.

118. As such, Defendant breached its duty of reasonable care and failed to exercise ordinary care in the design, research, development, manufacture, testing, marketing, supply, promotion, advertisement, packaging, sale, and distribution of its Roundup[®] products, in that Defendant manufactured and produced defective herbicides containing the chemical glyphosate, knew or had reason to know of the defects inherent in its products, knew or had reason to know that a user's or consumer's exposure to the products created a significant risk of harm and unreasonably dangerous side effects, and failed to prevent or adequately warn of these risks and injuries.

119. Despite its ability and means to investigate, study, and test its products and to provide adequate warnings, Defendant has failed to do so. Indeed, Defendant has wrongfully concealed information and has further made false and/or misleading statements concerning the safety and/or exposure to Roundup[®] and glyphosate.

120. Defendant's negligence included:

- a. Manufacturing, producing, promoting, formulating, creating, developing, designing, selling, and/or distributing its Roundup[®] products without thorough and adequate pre- and post-market testing;
- b. Manufacturing, producing, promoting, formulating, creating, developing, designing, selling, and/or distributing Roundup[®] while negligently and/or intentionally concealing and failing to disclose the results of trials, tests, and studies of exposure to glyphosate, and, consequently, the risk of serious harm associated with human use of and exposure to Roundup[®];
- c. Failing to undertake sufficient studies and conduct necessary tests to determine whether or not Roundup[®] products and glyphosate-containing products were safe for their intended use in agriculture and horticulture;
- d. Failing to use reasonable and prudent care in the design, research, manufacture, and development of Roundup[®] products so as to avoid the risk of serious harm associated with the prevalent use of Roundup[®]/glyphosate as an herbicide;
- e. Failing to design and manufacture Roundup[®] products so as to ensure they were at least as safe and effective as other herbicides on the market;
- f. Failing to provide adequate instructions, guidelines, and safety precautions to those persons who Defendant could reasonably foresee would use and be exposed to its Roundup[®] products;

- g. Failing to disclose to Plaintiff, users/consumers, and the general public that use of and exposure to Roundup[®] presented severe risks of cancer and other grave illnesses;
- h. Failing to warn Plaintiff, consumers, and the general public that the product's risk of harm was unreasonable and that there were safer and effective alternative herbicides available to Plaintiff and other consumers;
- i. Systematically suppressing or downplaying contrary evidence about the risks, incidence, and prevalence of the side effects of Roundup[®] and glyphosate-containing products;
- j. Representing that its Roundup[®] products were safe for their intended use when, in fact, Defendant knew or should have known that the products were not safe for their intended purpose;
- k. Declining to make or propose any changes to Roundup[®] products' labeling or other promotional materials that would alert the consumers and the general public of the risks of Roundup[®] and glyphosate;
- l. Advertising, marketing, and recommending the use of the Roundup[®] products, while concealing and failing to disclose or warn of the dangers known by Defendant to be associated with or caused by the use of or exposure to Roundup[®] and glyphosate;
- m. Continuing to disseminate information to its consumers, which indicates or implies that Defendant's Roundup[®] products are not unsafe for use in the agricultural and horticultural industries; and

n. Continuing the manufacture and sale of its products with the knowledge that the products were unreasonably unsafe and dangerous.

121. Defendant knew and/or should have known that it was foreseeable that consumers such as Plaintiff would suffer injuries as a result of Defendant's failure to exercise ordinary care in the manufacturing, marketing, labeling, distribution, and sale of Roundup[®].

122. Plaintiff did not know the nature and extent of the injuries that could result from the intended use of and/or exposure to Roundup[®] or its active ingredient glyphosate.

123. Defendant's negligence was the proximate cause of the injuries, harm, and economic losses that Plaintiff suffered, and will continue to suffer, as described herein.

124. Defendant's conduct, as described above, was reckless. Defendant regularly risks the lives of consumers and users of their products, including Plaintiff, with full knowledge of the dangers of its products. Defendant has made conscious decisions not to redesign, re-label, warn, or inform the unsuspecting public, including Plaintiff. Defendant's reckless conduct therefore warrants an award of punitive damages.

125. As a proximate result of Defendant's wrongful acts and omissions in placing its defective Roundup[®] products into the stream of commerce without adequate warnings of the hazardous and carcinogenic nature of glyphosate, Plaintiff has suffered and continues to suffer severe and permanent physical and emotional injuries. Plaintiff has endured pain and suffering, has suffered economic losses (including significant expenses for medical care and treatment) and will continue to incur these expenses in the future.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred,

attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands a jury trial on the issues contained herein.

CLAIM FOUR

BREACH OF EXPRESS WARRANTIES

126. Plaintiff incorporates by reference each and every allegation set forth in the preceding paragraphs as if fully stated herein.

127. At all times relevant to this litigation, Defendant engaged in the business of testing, developing, designing, manufacturing, marketing, selling, distributing, and promoting its Roundup[®] products, which are defective and unreasonably dangerous to consumers, including Plaintiff, thereby placing Roundup[®] products into the stream of commerce. These actions were under the ultimate control and supervision of Defendant.

128. Defendant had a duty to exercise reasonable care in the research, development, design, testing, packaging, manufacture, inspection, labeling, distributing, marketing, promotion, sale, and release of its Roundup[®] products, including a duty to:

- a. ensure that its products did not cause the user unreasonably dangerous side effects;
- b. warn of dangerous and potentially fatal side effects; and
- c. disclose adverse material facts, such as the true risks associated with the use of and exposure to Roundup[®] and glyphosate-containing products, when making representations to consumers and the general public, including Plaintiff.

129. At all times relevant to this litigation, Defendant expressly represented and warranted to the purchasers of its products, by and through statements made by Defendant in

labels, publications, package inserts, and other written materials intended for consumers and the general public, that its Roundup[®] products were safe to human health and the environment, effective, fit, and proper for their intended use. Defendant advertised, labeled, marketed, and promoted Roundup[®] products, representing the quality to consumers and the public in such a way as to induce their purchase or use, thereby making an express warranty that its Roundup[®] products would conform to the representations.

130. These express representations include incomplete warnings and instructions that purport but fail to include the complete array of risks associated with use of and/or exposure to Roundup[®] and glyphosate, a proven carcinogen. Defendant knew or should have known that the risks expressly included in Roundup[®] warnings and labels did not and do not accurately or adequately set forth the risks of developing the serious injuries complained of herein. Nevertheless, Defendant expressly represented that its Roundup[®] products were safe and effective, that they were safe and effective for use by individuals such as Plaintiff, and/or that they were safe and effective as agricultural herbicides.

131. The representations about Roundup[®], as set forth herein, contained or constituted affirmations of fact or promises made by the seller to the buyer, which related to the goods and became part of the basis of the bargain, creating an express warranty that the goods would conform to the representations.

132. Defendant placed its Roundup[®] products into the stream of commerce for sale and recommended their use to consumers and the public without adequately warning of the true risks of developing the injuries associated with the use of and exposure to Roundup[®] and its active ingredient glyphosate.

133. Defendant breached these warranties because, among other things, its Roundup[®] products were defective, dangerous, unfit for use, did not contain labels representing the true and adequate nature of the risks associated with their use, and were not merchantable or safe for their intended, ordinary, and foreseeable use and purpose. Specifically, Defendant breached the warranties in the following ways:

- a. Defendant represented through its labeling, advertising, and marketing materials that its Roundup[®] products were safe, and fraudulently withheld and concealed information about the risks of serious injury associated with use of and/or exposure to Roundup[®] and glyphosate by expressly limiting the risks associated with use and/or exposure within its warnings and labels; and
- b. Defendant represented that its Roundup[®] products were safe for use and fraudulently concealed information that demonstrated that glyphosate, the active ingredient in Roundup[®], had carcinogenic properties, and that its Roundup[®] products, therefore, were not safer than alternatives available on the market.

134. Upon information and belief, Plaintiff's employer was at all relevant times in privity with Defendant.

135. Plaintiff is the intended third-party beneficiaries of express warranties made by Defendant to the purchasers of its herbicides, including the company that employed Plaintiff, and as such Plaintiff is entitled to assert this claim.

136. On information and belief, Plaintiff's employer justifiably and detrimentally relied on the express warranties and representations of Defendant in the purchase and use of its

Roundup[®] products. When Plaintiff's employer made the decision to purchase Roundup[®], it reasonably relied upon Defendant to disclose known defects, risks, dangers, and side effects of Roundup[®] and glyphosate.

137. Defendant had sole access to material facts concerning the nature of the risks associated with its Roundup[®] products as expressly stated within its warnings and labels, and Defendant knew that consumers, and users such as Plaintiff, could not have reasonably discovered that the risks expressly included in Roundup[®] warnings and labels were inadequate and inaccurate.

138. Plaintiff's employer and Plaintiff had no knowledge of the falsity or incompleteness of Defendant's statements and representations concerning Roundup[®].

139. Plaintiff used and/or was exposed to the use of Roundup[®] as researched, developed, designed, tested, manufactured, inspected, labeled, distributed, packaged, marketed, promoted, sold, or otherwise released into the stream of commerce by Defendant.

140. Had the warnings and labels for Roundup[®] products accurately and adequately set forth the true risks associated with the use of such products, including Plaintiff's injuries, rather than expressly excluding such information and warranting that the products were safe for their intended use, Plaintiff could have avoided the injuries complained of herein.

141. As a direct and proximate result of Defendant's wrongful acts and omissions, Plaintiff has suffered severe and permanent physical and emotional injuries. Plaintiff has endured pain and suffering, has suffered economic losses (including significant expenses for medical care and treatment), and will continue to incur these expenses in the future.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred,

attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands a jury trial on the issues contained herein.

CLAIM FIVE

BREACH OF IMPLIED WARRANTIES

142. Plaintiff incorporates by reference each and every allegation set forth in the preceding paragraphs as if fully stated herein.

143. At all times relevant to this litigation, Defendant engaged in the business of testing, developing, designing, manufacturing, marketing, selling, distributing, and promoting its Roundup[®] products, which are defective and unreasonably dangerous to consumers, including Plaintiff, thereby placing Roundup[®] products into the stream of commerce. These actions were under the ultimate control and supervision of Defendant.

144. Before the time that Plaintiff used and/or was exposed to the use of the aforementioned Roundup[®] products, Defendant impliedly warranted to its consumers—including Plaintiff's employer—that its Roundup[®] products were of merchantable quality and safe and fit for the use for which they were intended; specifically, as horticultural herbicides.

145. Defendant, however, failed to disclose that Roundup[®] has dangerous propensities when used as intended and that the use of and/or exposure to Roundup[®] and glyphosate-containing products carries an increased risk of developing severe injuries, including Plaintiff's injuries.

146. Upon information and belief, Plaintiff's employers reasonably relied upon the skill, superior knowledge and judgment of Defendant and upon its implied warranties that the Roundup[®] products were of merchantable quality and fit for their intended purpose or use.

147. Upon information and belief, Plaintiff's employer was at all relevant times in privity with Defendant.

148. Plaintiff is the intended third-party beneficiaries of implied warranties made by Defendant to the purchasers of its horticultural herbicides, including the company that employed Plaintiff, and as such Plaintiff is entitled to assert this claim.

149. The Roundup[®] products were expected to reach and did in fact reach consumers and users, including Plaintiff, without substantial change in the condition in which they were manufactured and sold by Defendant.

150. At all times relevant to this litigation, Defendant was aware that consumers and users of its products, including Plaintiff, would use Roundup[®] products as marketed by Defendant, which is to say that Plaintiff was a foreseeable user of Roundup[®].

151. Defendant intended that its Roundup[®] products be used in the manner in which Plaintiff in fact used them and Defendant impliedly warranted each product to be of merchantable quality, safe, and fit for this use, despite the fact that Roundup[®] was not adequately tested or researched.

152. In reliance upon Defendant's implied warranty, Plaintiff used Roundup[®] as instructed and labeled and in the foreseeable manner intended, recommended, promoted and marketed by Defendant.

153. Neither Plaintiff nor Plaintiff's employer could have reasonably discovered or known of the risks of serious injury associated with Roundup[®] or glyphosate.

154. Defendant breached its implied warranty to Plaintiff in that its Roundup[®] products were not of merchantable quality, safe, or fit for their intended use, or adequately tested.

Roundup[®] has dangerous propensities when used as intended and can cause serious injuries, including those injuries complained of herein.

155. The harm caused by Defendant's Roundup[®] products far outweighed their benefit, rendering the products more dangerous than an ordinary consumer or user would expect and more dangerous than alternative products.

156. As a direct and proximate result of Defendant's wrongful acts and omissions Plaintiff has suffered severe and permanent physical and emotional injuries. Plaintiff has endured pain and suffering, have suffered economic loss (including significant expenses for medical care and treatment) and will continue to incur these expenses in the future.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands a jury trial on the issues contained herein.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff requests that the Court enter judgment in their favor and against Monsanto, awarding as follows:

- A. compensatory damages in an amount to be proven at trial;
- B. punitive damages;
- C. costs including reasonable attorneys' fees, court costs, and other litigation expenses; and
- D. any other relief the Court may deem just and proper.

JURY TRIAL DEMAND

Plaintiff demands a trial by jury on all of the triable issues within this Complaint.

CERTIFICATION OF ARBITRATION ELIGIBILITY

Local Arbitration Rule 83.10 provides that with certain exceptions, actions seeking money damages only in an amount not in excess of \$150,000, exclusive of interest and costs, are eligible for compulsory arbitration. The amount of damages is presumed to be below the threshold amount unless a certification to the contrary is filed.

I, Maja Lukic, counsel for Plaintiff, do hereby certify that the above captioned civil action is ineligible for compulsory arbitration for the following reason(s):

- monetary damages sought are in excess of \$150,000, exclusive of interest and costs,
- the complaint seeks injunctive relief,
- the matter is otherwise ineligible for the following reason

DISCLOSURE STATEMENT - FEDERAL RULES CIVIL PROCEDURE 7.1

Identify any parent corporation and any publicly held corporation that owns 10% or more of its stocks:

RELATED CASE STATEMENT (Section VIII on the Front of this Form)

Please list all cases that are arguably related pursuant to Division of Business Rule 50.3.1 in Section VIII on the front of this form. Rule 50.3.1 (a) provides that "A civil case is "related" to another civil case for purposes of this guideline when, because of the similarity of facts and legal issues or because the cases arise from the same transactions or events, a substantial saving of judicial resources is likely to result from assigning both cases to the same judge and magistrate judge." Rule 50.3.1 (b) provides that " A civil case shall not be deemed "related" to another civil case merely because the civil case: (A) involves identical legal issues, or (B) involves the same parties." Rule 50.3.1 (c) further provides that "Presumptively, and subject to the power of a judge to determine otherwise pursuant to paragraph (d), civil cases shall not be deemed to be "related" unless both cases are still pending before the court."

NY-E DIVISION OF BUSINESS RULE 50.1(d)(2)

- 1.) Is the civil action being filed in the Eastern District removed from a New York State Court located in Nassau or Suffolk County? No
- 2.) If you answered "no" above:
 - a) Did the events or omissions giving rise to the claim or claims, or a substantial part thereof, occur in Nassau or Suffolk County? Yes
 - b) Did the events of omissions giving rise to the claim or claims, or a substantial part thereof, occur in the Eastern District? Yes

If your answer to question 2 (b) is "No," does the defendant (or a majority of the defendants, if there is more than one) reside in Nassau or Suffolk County, or, in an interpleader action, does the claimant (or a majority of the claimants, if there is more than one) reside in Nassau or Suffolk County? _____

(Note: A corporation shall be considered a resident of the County in which it has the most significant contacts).

BAR ADMISSION

I am currently admitted in the Eastern District of New York and currently a member in good standing of the bar of this court.

- Yes
- No

Are you currently the subject of any disciplinary action (s) in this or any other state or federal court?

- Yes (If yes, please explain)
- No

I certify the accuracy of all information provided above.

AO 440 (Rev. 06/12) Summons in a Civil Action

UNITED STATES DISTRICT COURT

for the

Eastern District of New York

JUDI FITZGERALD

Plaintiff(s)

v.

MONSANTO COMPANY

Defendant(s)

Civil Action No. 1:15-cv-05494

SUMMONS IN A CIVIL ACTION

To: (Defendant's name and address) MONSANTO COMPANY
C/O CORPORATION SERVICE COMPANY
80 STATE STREET
ALBANY, NEW YORK, 12207-2543

A lawsuit has been filed against you.

Within 21 days after service of this summons on you (not counting the day you received it) — or 60 days if you are the United States or a United States agency, or an officer or employee of the United States described in Fed. R. Civ. P. 12 (a)(2) or (3) — you must serve on the plaintiff an answer to the attached complaint or a motion under Rule 12 of the Federal Rules of Civil Procedure. The answer or motion must be served on the plaintiff or plaintiff's attorney, whose name and address are: Maja Lukic, Weitz & Luxenberg, P.C., 700 Broadway, New York, NY 10003

If you fail to respond, judgment by default will be entered against you for the relief demanded in the complaint. You also must file your answer or motion with the court.
